

ADHITYA AFIF ARDANA

Yogyakarta, Indonesia | [WhatsApp](#) | [Email](#) | [LinkedIn](#) | [Portofolio](#) | [Github](#)

AI & Full-Stack Developer and Informatics Engineering undergraduate with a **3.83/4.00 GPA**, experienced in building web, mobile, data, and AI-related solutions through internships, intensive training, and portfolio projects. Technically proficient in **JavaScript/TypeScript, React/Next.js, Flutter, Laravel/PHP, MySQL, REST APIs, Python, and Streamlit**. Interested in **AI Engineering, Generative AI & LLMs, and Backend & Cloud Systems**, with a track record of translating user and business needs into practical digital products. Currently seeking an **entry-level AI Engineering or Full-Stack Development opportunity** to contribute, learn, and grow in a collaborative technical team.

EDUCATION

Universitas Sarjanawiyata Tamansiswa Jan 2022 - Present
Bachelor of Informatics (Informatics Engineering)

SMK Muhammadiyah Imogiri Jul 2019 - Jan 2022
Vocational High School Diploma in Computer and Network Engineering

PROFESSIONAL EXPERIENCE

Korean-ASEAN Digital Academy (KADA), Jakarta, Indonesia Jun 2026 - Aug 2026
Software Development, Data & AI

- Completed intensive training across **software development, data analytics, AI and LLM applications, DevOps/CI/CD, and UI/UX**, collaborating on an end-to-end capstone project.
- Recognized as Best Student Graduate; applied structured problem-solving, product planning, development, and presentation skills throughout the capstone project.

Vocational Training and Productivity Development Center (BLKPP), Yogyakarta, Indonesia May 2026 - Jun 2026
Data Science and Data Analyst

- Completed structured training in **data science and data analytics**, strengthening practical skills in data preparation, exploratory data analysis, visualization, and analytical problem-solving.

Communication and Informatics Office of the Special Region of Yogyakarta (DISKOMINFO DIY) Apr 2025 - May 2025
Flutter Front-End & UI/UX Intern (APTIKA Division)

- Designed user flows and interface screens in **Figma** for **Jogja Istimewa (JogJis)**, a public digital-service application, translating user needs and internal feedback into clear interface solutions.
- Translated approved designs into responsive **Flutter** components, integrated **REST APIs**, and collaborated with the team on design reviews and technical issue resolution.

PT Winnicode Garuda Indonesia (MSIB Kampus Merdeka) Jan 2024 - Jun 2024
Full-Stack Web Developer Intern

- Engineered **6 core modules** for a responsive online news portal using **Laravel, PHP, Bootstrap, and MySQL**, including the homepage, category pages, article details, search, authentication, and admin dashboard.
- Implemented **CRUD workflows** and connected application interfaces to **MySQL** through the **MVC** architecture, supporting structured content management.
- Performed functional testing and debugging while using **Git and GitHub** for version control and traceable code changes.

PROJECTS

Interactive 3D Skateboard E-Commerce Platform

Tools: Next.js, React, TypeScript, Three.js, React Three Fiber, Tailwind CSS, GSAP, Clerk, PayPal

Project Overview: Built an interactive 3D skateboard customizer and e-commerce experience inspired by Yogyakarta skate culture.

Key Contributions:

- Developed a real-time 3D configurator using **Three.js** and **React Three Fiber**, enabling users to customize decks, wheels, trucks, and bolts.
- Implemented **Clerk authentication, persistent shopping cart, PayPal checkout, account management, and order tracking** for a complete storefront experience.
- Added **GSAP animations, Matter.js physics interactions, and responsive layouts** optimized for mobile, tablet, and desktop.

[Live Demo](#) | [GitHub](#)

RailCast Indonesia Railway Passenger Forecasting

Tools: Python, Pandas, Statsmodels, Scikit-learn, SARIMA, Holt-Winters, Prophet, Streamlit

Project Overview: Built an end-to-end time-series forecasting pipeline for monthly Indonesian railway passenger data from official BPS sources.

Key Contributions:

- Validated **126 monthly observations** from Jan 2016 to Jun 2026 and audited data quality, trend, seasonality, volatility, and structural breaks.
- Compared **five forecasting approaches** using chronological holdout evaluation and rolling-origin cross-validation.
- Selected **SARIMA** as the best model with **3.33% test MAPE**, then deployed a **Streamlit dashboard** with 3/6/12-month forecasts and 95% uncertainty intervals.

[Live Demo](#) | [GitHub](#)

EduTrack Integrated Academic Management System

Tools: React, Vite, Express, Node.js, PostgreSQL, Supabase, AWS, Gemini AI

Project Overview: Contributed to a role-based academic management platform developed as a KADA Batch 4 capstone project.

Key Contributions:

- Collaborated across the **React/Vite frontend, Express backend, and PostgreSQL/Supabase data layer** to support teachers, students, and administrators.
- Supported workflows for **authentication, attendance, grading, report cards, class assignments, and AI-assisted report-note drafting** with Gemini.

[Live Demo](#) | [GitHub](#)

Koperasi Desa Merah Putih Indonesian Public Sentiment Analysis

Tools: Python, Pandas, NumPy, IndoBERT, Sastrawi, TF-IDF, Scikit-learn, Streamlit, Supabase

Project Overview: Built an end-to-end NLP pipeline to analyze Indonesian public sentiment toward the Koperasi Desa Merah Putih program.

Key Contributions:

- Processed **220,051 TikTok comments** from 27 videos through data-quality auditing, deduplication, Indonesian text preprocessing, and IndoBERT-based labeling.
- Trained and compared **Logistic Regression, SVM, and Naive Bayes** models using **TF-IDF** features; Logistic Regression achieved **71.98% accuracy** and **0.693 macro F1-score**.
- Developed a multi-page **Streamlit** application with real-time prediction, Supabase PostgreSQL storage, and Metabase analytics dashboards.

[Live Demo](#) | [GitHub](#)

SKILLS

- Languages:** Python, JavaScript (ES6+), TypeScript, PHP, SQL
- AI/Data:** Generative AI & LLM Applications, Data Analytics, Data Cleaning, EDA, Feature Engineering, PCA, K-Means, Streamlit
- Frontend/Backend:** React.js, Next.js, Flutter, HTML5, CSS3, Tailwind CSS, Bootstrap, Laravel, REST API, MySQL
- 3D/UI/UX:** Three.js, React Three Fiber, GSAP, WebGL, Figma, Wireframing, Prototyping, Design Systems, Usability Testing, Accessibility
- Tools:** Git, GitHub, Visual Studio Code, Postman, DBeaver, Blynk
