

ADHITYA AFIF ARDANA

Yogyakarta, Indonesia | [+62 888-2816-488](tel:+62888-2816-488) | adhityaardana73@gmail.com | [linkedin.com/in/apiipp-com](https://www.linkedin.com/in/apiipp-com) | github.com/apiipp-co

Entry-level UI/UX Designer and Front-End Developer with hands-on experience in Figma, React.js, Next.js, TypeScript, Tailwind CSS, and Three.js through internships, an award-winning mobile UI/UX project, and an interactive 3D e-commerce platform.

Experienced in translating user needs into responsive, accessible, and development-ready interfaces through user flows, prototyping, and modern front-end development. Passionate about building user-centered digital products and seeking an entry-level opportunity to contribute, learn, and grow within a collaborative product team.

PROFESSIONAL EXPERIENCE

Dinas Komunikasi dan Informatika DIY, Yogyakarta, Indonesia *Flutter Front-End & UI/UX Intern (APTIKA Division)*

Apr 2025 - May 2025

- Designed interface flows and screens in Figma for the "Jogja Istimewa (JogJis)" public digital-service application to align the experience with user needs and internal feedback.
- Translated interface designs into responsive Flutter components to improve layout, navigation, and UI consistency across screen sizes.
- Integrated REST APIs and collaborated with a cross-functional team on design evaluation, feature implementation, and technical issue resolution.

PT Winnicode Garuda Indonesia (MSIB Kampus Merdeka) *Full-Stack Web Developer Intern*

Jan 2024 - Jun 2024

- Developed 6 core modules for a responsive online news portal using Laravel, PHP, Bootstrap, and MySQL: homepage, categories, article details, search, authentication, and an admin dashboard.
- Implemented CRUD workflows and connected the interface to a MySQL database through MVC architecture to support structured content management.
- Tested and debugged application features while managing source code with Git and GitHub to improve stability and maintain traceable changes.

PROJECTS

Interactive 3D Skateboard E-Commerce Platform *Front-End Developer & UI/UX Designer | 2026*

Tools: Next.js | React | TypeScript | Tailwind CSS | GSAP | Three.js | React Three Fiber | Drei | PWA | IndexedDB

Project Overview: Extended an Apache-2.0 open-source skateboard project into a responsive, multi-page e-commerce experience while preserving its editorial street-skate identity.

Key Contributions:

- Built 8 core commerce capabilities, including search, filtering, sorting, wishlist, cart, demo checkout, setup recommendations, and product comparison, plus 5 editorial pages: Team, About, Lookbook, Tricks, and Journal.
- Developed a real-time 3D skateboard configurator with component selection, responsive controls, saved and shareable setups, and a fallback when WebGL is unavailable.
- Implemented 2 client-side persistence layers using localStorage and IndexedDB, together with PWA installation, offline fallback, application updates, and the Web Share API.
- Improved responsive navigation, accessibility, reduced-motion behavior, loading states, and visual consistency across 3 device classes: desktop, tablet, and mobile.

Mobike App - Mobile UI/UX Design (Competition Entry, 1st Place)

Tools: Figma

Project Overview: Designed an end-to-end mobile UI/UX concept for a bike-sharing application, emphasizing usability and a clear booking journey.

Key Contributions:

- Mapped the user flow from onboarding through bike booking and payment to define key usability requirements.
- Created wireframes, high-fidelity screens, and a consistent design system for color, typography, and reusable components.
- Built an interactive prototype to validate navigation logic before submission; the project won 1st Place for interface clarity and overall usability.

Proof: [Certificate](#)

Online News Portal - Full-Stack Web Development

Tools: Laravel | PHP | Bootstrap | MySQL | Git

Project Overview: Built a responsive news portal with 6 core modules covering public content, search, authentication, and administration during the MSIB Kampus Merdeka internship.

Key Contributions:

- Developed front-end and back-end features using Laravel, PHP, Bootstrap, and MVC architecture.
- Implemented CRUD functionality and connected the interface to a MySQL database.
- Tested and debugged application features while maintaining source-code changes with Git and GitHub.

JogJis (Jogja Istimewa) App - UI/UX & Flutter Front-End

Tools: Figma | Flutter | REST API

Project Overview: Designed and helped implement a public digital-service interface for the Yogyakarta Regional Communication and Informatics Office.

Key Contributions:

- Designed interface flows and screens in Figma based on user needs and feedback from the internal team.
- Translated approved designs into responsive Flutter components with consistent layout, navigation, typography, and colors.
- Integrated REST APIs and collaborated with a cross-functional team to evaluate designs and resolve technical issues.

SKILLS

Design Tools | Figma, FigJam, Stitch, Canva, Draw.io, Lucidchart

UX Research | User-Centered Design, Design Thinking, User Flows, Information Architecture, Usability Testing, Think-Aloud Testing

UI Design | Wireframing, Interactive Prototyping, Design Systems, Responsive Design, Accessibility, Design Handoff

Frontend | HTML5, CSS3, JavaScript (ES6), TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Basic Flutter

3D & Web | Three.js, React Three Fiber, Drei, GSAP, WebGL, PWA, IndexedDB, localStorage, Web Share API

Backend & Database | PHP, Laravel, MySQL, REST API

Version Control & Tools | Git, GitHub, Visual Studio Code, Postman, DBeaver

EDUCATION

Universitas Sarjanawiyata Tamansiswa, Yogyakarta, Indonesia

Jan 2022 - Present

Bachelor of Informatics

- Current GPA: 3.83 / 4.00

TRAINING & CERTIFICATION

- **Full-Stack Development and Artificial Intelligence Trainee**

Korean-ASEAN Digital Academy (KADA) Batch 4, Ministry of Communication and Digital Affairs RI | Jun 2026 - Aug 2026

- **Data Science and Data Analyst Trainee**

BLKPP Special Region of Yogyakarta | May 2025 - Apr 2026
